A decorative graphic on the left side of the slide. It consists of a blue parallelogram and a light green parallelogram, both tilted at an angle. The blue shape is in the foreground, and the green shape is partially behind it. They are set against a dark blue background with faint, lighter blue diagonal stripes.

# Traffic Collision Analysis in SF

# Questions to Consider

- What areas in SF have the highest density of collisions?
- Were there less accidents during the COVID lockdowns compared to now?
- Are fatal accidents more prevalent than non-fatal accidents?
- Are car accidents more common in densely populated areas?
- What days experience the highest frequency of accidents?

# Target Audience

There are a variety of individuals who are concerned about traffic safety:

- First Responders
- Traffic Engineers
- Urban Planners
- Logistic Companies
- Insurance Companies
- Work From Home Policy Creators

# Data Discovery and ETL

DATA SET: SF TRAFFIC CRASHES RESULTING IN INJURY

- This data includes all crashes resulting in an injury in the city of San Francisco
  - Dataset is updated quarterly
  - Source: SFPD/SFDPH
  - Each API call returns 1,000 records

## EXTRACT

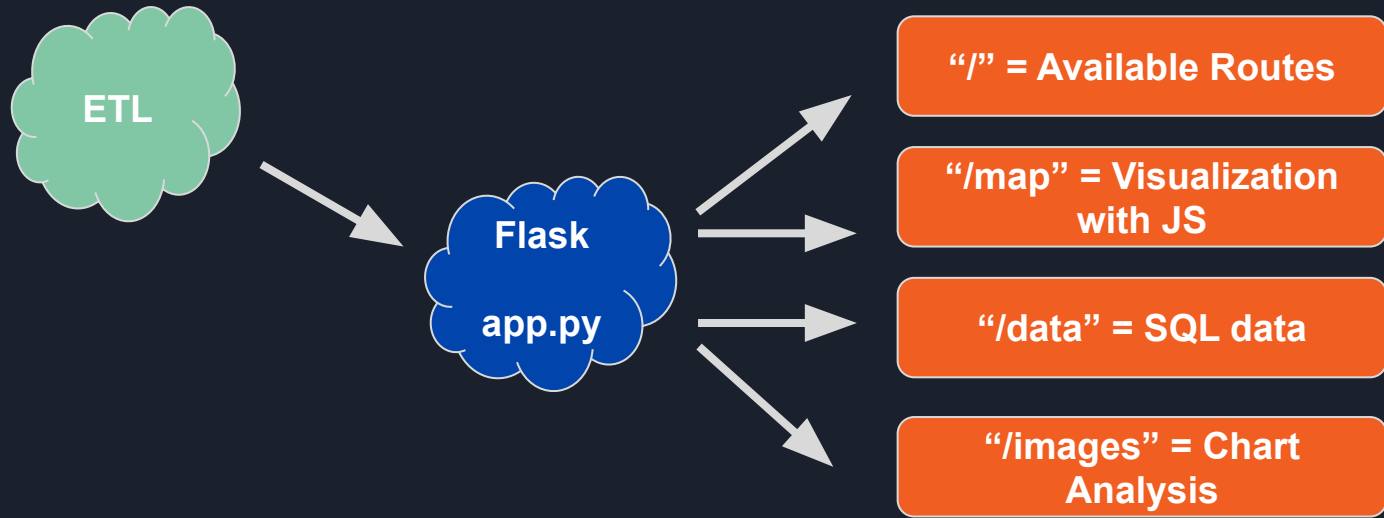

API Request  
↓  
request.json to  
Pandas df

## TRANSFORM

- Dropped rows that did not have lat/lon data or collision time
- Changed Datatypes
  - Crash Date to “datetime”
  - Crash time to “hour”
  - Injury/Fatality numbers to “int”
  - Lat/Lon to “float”
- Binned incidents based on time of day

## LOAD

Saved as SQLite DB

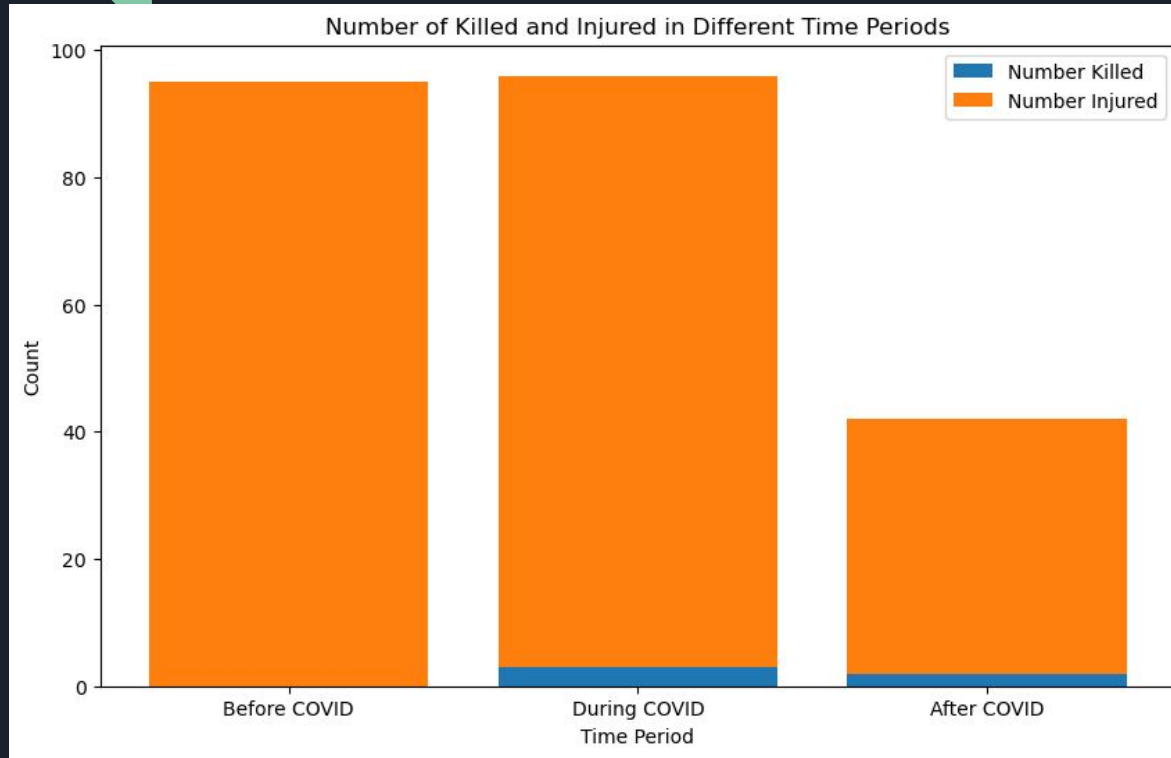

## WebApp Development Process

# DEMO

<http://127.0.0.1:5000/>

# Visualization #1: Positive side effects from WFH

**Collision Rates: A Comparative Analysis Before, During, and After the COVID-19 Pandemic**

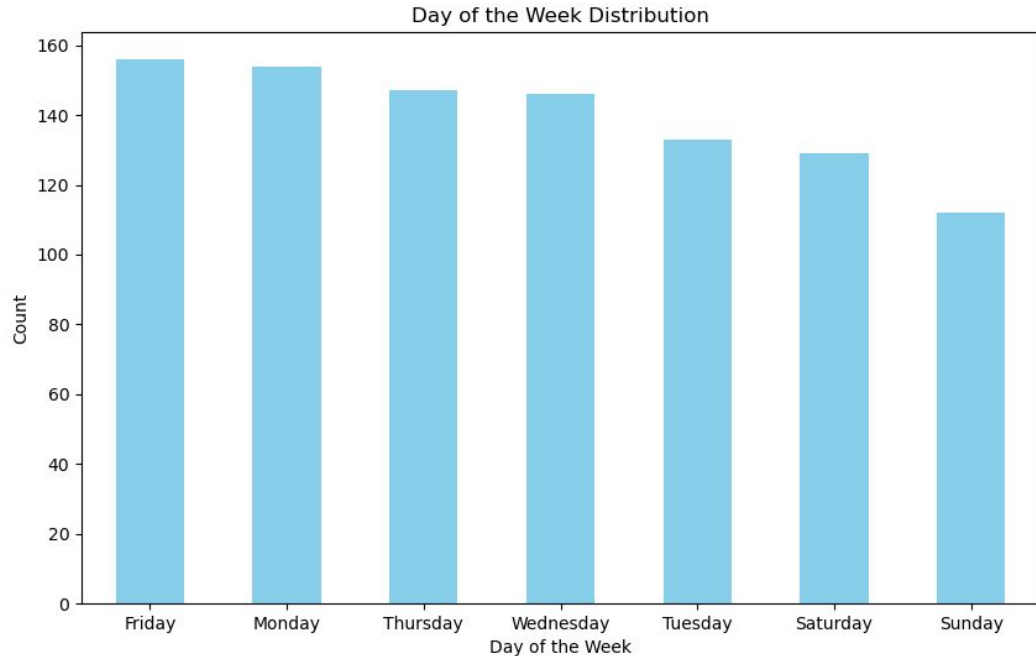

## Visualization #2: Rush hour is actually... safe?

Most dangerous times to  
drive in SF

## Visualization #3: Hooray it's Friday?

Analyze the data to discover correlations between these days and collisions.

# Insights

- Most traffic accidents in San Francisco are non fatal
- There appears to be a significant difference in traffic accidents during COVID lock downs compared to post COVID lock downs
- The majority of traffic accidents occur at the end of the week and in the Downtown area
- Van Ness Avenue and Market Street have the most traffic accidents

# Challenges

- Creating the pop up icons for the traffic collision map
- Wanted to show outlines of different neighborhoods on map but ran into issues (also there are A LOT of neighborhoods in SF)
- Creating the bar graphs for post covid and pre covid collision analysis

Thank you for watching! Questions?
